BLOWER CABINET WITH HIGH-EFFICIENCY YORK HEAT PUMP

10-year warranty on parts and compressor

York central heat pumps are characterized by their exceptional design and durability. Each component is carefully selected for optimum performance. The aluminum heat exchanger guarantees superior energy efficiency, while the high-quality insulation enhances thermal efficiency. Unlike conventional systems, the

heat is supplied by the compressor of the heat pump, which then efficiently transfers it to the furnace coil. This innovative process delivers significant savings on heating costs.

Eligible for the  **CHAUFFEZ VERT** subsidy when converting to electricity

Eligible for the  **Programme LogisVert** d'Hydro-Québec subsidy

GET \$500 OFF AND 12 MONTHS INTEREST-FREE

Plus a \$500 cheque from York for Canadian consumers (conditions apply).

BLOWER CABINET WITH HIGH-EFFICIENCY GREE HEAT PUMP

10-year warranty on parts and compressor

Reduce climate change with energy-efficient heating. Heat pumps have often been challenged to maintain their efficiency even in the coldest weather. However, the Unix central system, equipped with advanced technology developed by GREE, ensures powerful heating capacity even with outdoor temperatures as low as -30°C .

The perfect solution for Canada's harsh winters.

Eligible for the  **CHAUFFEZ VERT** subsidy when converting to electricity
